DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 33-55 are, drawn to a process of preparing fuel, classified in class 210, subclass 652.
 - II. Claims 56-59, drawn to a system including a high temperature fuel cell, classified in class 429 subclass 17.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus claimed can be use in a distinct process e.g. in production of different hydrocarbon compounds.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Wolfgang g. Fasse on 9/17/06 a provisional election was made with traverse to prosecute the invention of group I, claim33-55.

Affirmation of this election must be made by applicant in replying to this Office action.

Claims 56-59 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

EXAMINER'S AMENDMENT

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Wolfgang G. Fasse on 9/17/06.

Cancel claims 56-59.

REASONS FOR ALLOWANCE

7. The following is an examiner's statement of reasons for allowance: claims 33-55 are allowed over the prior art of record. The invention of claims 33 and dependent claims 32-55 are not disclosed or suggested in the prior art of record. Integrating waste water reclamation and emulsion production to produce fuel in a gap arrangement to electrolytically cracking the emulsion is not disclosed or suggested in the prior art of

record. Applicant argument filed on 7/24/06 are persuasive, see arguments section 7, page 13, last paragraph through page 14, line 18. Applicant discloses the fuel cell as conventional in the art, however, the combination of waste water treatment step with emulsifying step in combination with the particular structure claimed in step d) of claim 33, is not suggested in the prior art of record.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ana M. Fortuna whose telephone number is (571) 272-1141. The examiner can normally be reached on 9:30-6:00 M-F.
